

David K. Lynch, PhD

Education: PhD Astronomy, University of Texas at Austin
BS Astrophysics, Indiana University

Dave is an astrophysicist and of late a geologist. He postdocced in the Caltech Physics Dept and the UC Berkeley Radiophysics group. Infrared spectroscopy of cosmic sources is his specialty (star formation regions, pre-main sequence stars, novae, supernovae and solar system objects). Dave has used telescopes all over the world, including NASA and USAF airborne observatories and multiple satellite telescopes. His recent work involves tectonics and geology of the Mojave and Sonora deserts. Dave has over two hundred peer-review journal publications and is currently a geophysical consultant.

Relevant Publications since 2000

Books

- Lynch, D. K., Field Guide to the San Andreas Fault, Thule Scientific Press (2006)
Lynch, D. K., K. Sassen, D. Starr and G. Stephens (eds), Cirrus, Oxford University Press, (2002)
Lynch, D. K. and W.C. Livingston, Color and Light in Nature, Cambridge University Press (2001).
